[What is Sustainable Energy and its types- Conserve Energy ...](#)

What is Sustainable Energy? Sustainable energy is a form of energy that meet our today's demand of energy without putting them in danger of getting expired or depleted and can be used over and over again.

[Sustainable energy - Wikipedia](#)

Sustainable energy is energy that is consumed at insignificant rates compared to its supply and with manageable collateral effects, especially environmental effects. Another common definition of sustainable energy is an energy system that serves the needs of the present without compromising the ability of future generations to meet their energy needs. Not all renewable energy is sustainable.

[Renewable and sustainable energy - Energy Education](#)  
The words "sustainable" and "renewable" are often used to describe certain sources of primary energy, often interchangeably. However, these words have very different meanings. Not everything renewable is sustainable, and in turn not everything which is sustainable is necessarily renewable.
